IF SOMETHING GOES WRONG

Login fails	"Wrong code or PIN" → check the slip (AIF-0XX, 6 digits). "Too many attempts" → Teams → More → Reset PIN . "Login server is busy" → wait 30 s; stagger logins; owner raises the Supabase rate limit.
Team's data isn't saving	Look at their save indicator. "No connection" → Wi-Fi, keep the tab open. "Teammate changed this" → copy text, click <i>load the latest version</i> , one editor only. "Time up / closed" → deadline passed or already submitted → +5 or unlock if fair. Control room shows their Last activity.
Wi-Fi drops (room)	Pause the clock: Extend deadline by the outage. Edits are kept in open tabs and save on reconnect. Long outage → paper forms + printed case copies.
Submission fails	"Couldn't confirm" → press Submit again (safe, never duplicates). Check the Report page for green "Submitted at", or the Control room status. Unsubmitted work is auto-locked and still scored.
Admin clicked something by mistake	STOP, don't click more . Wrong timer → <i>Change timer</i> . Submitted by mistake → <i>unlock</i> (only while that phase runs). Wrong phase → going back needs BACK and does not unlock reports; usually better to continue. Never press Reset during the event.
Judge can't access a team	"View only / not assigned" → Results → Assign judges again (scores are kept) or check the judge is in the top-N list. Presentation box missing → the team isn't shortlisted. Judge can't log in → check email/password (admin can reset it in Supabase); meanwhile note scores on paper.
